8 July 2016

MEMORANDUM FOR: SAR Coordinators, Training Officers and Search Mission Coordinators

SUBJECT: Inland SAR Planning Course Schedule for Federal Fiscal Year 2017

1. The National Search and Rescue School is proud to announce the FY17 Inland SAR Planning Course schedule:

<u>Course Number</u>	<u>Dates</u>	<u>Location</u> <i>(Specific locations are subject to change)</i>	<u>Application Deadline</u>
17-01	24-28 October 2016	TRACEN Yorktown, VA	12 Sep 2016
17-02	7-11 November 2016	Glendale, AZ	26 Sep 2016
17-03	5-9 December 2016	Meridian, MS	24 Oct 2016
17-04	9-13 January 2017	Eugene, OR	28 Nov 2016
17-05	6-10 February 2017	Nashville, TN	19 Dec 2016
17-06	20-24 March 2017	Salt Lake City, UT	6 Feb 2017
17-07	10-14 April 2017	Frankfort, KY	27 Feb 2017
17-08	1-5 May 2017	Oriskany, NY	20 Mar 2017
17-09	5-9 June 2017	New Orleans, LA	24 Apr 2017
17-10	17-21 July 2017	Bismarck, ND	5 Jun 2017
17-11	21-25 August 2017	Bloomington, IL	10 Jul 2017
17-12	11-15 September 2017	Little Rock, AR	31 July 2017

2. The Inland SAR Planning Course is an advanced course for experienced on-scene decision makers, planners, operations leaders, and direct support staff members. It presents mathematically based search planning tools with solid theoretical underpinnings, along with some allied topics, focused on improving overall SAR response and success.

3. Openings in each class are limited and must be shared between a variety of agencies and student backgrounds, experience, and organizational tiers. While the school accepts applications directly, the state or agency SAR Coordinator's administration of applications is preferred to ensure all state/local SAR organizations are represented and the appropriate student experience/training background is achieved.

a. Application deadlines are approximately 6 weeks before class start dates. A welcome package will be sent to confirm attendance no later than 30 days before class start dates; students must firmly commit to attend at that time. Interested agencies should contact the school early to reserve quotas.

b. All Civil Air Patrol (CAP) members must apply through their wing training office to CAP National HQ.

4. The classes are offered tuition-free to US citizens involved directly in SAR. However, each student or their organization is responsible for all personal expenses, travel, lodging, meals, etc.

5. For questions, registration information, or to discuss sponsoring a class in FY18, please contact the school at (757) 856-2273, by fax at -2948, or by e-mail to **TCY-PF-InlandSAR@uscg.mil**. For more information, please visit the National SAR School web page at <http://www.uscg.mil/tcyorktown/Ops/SAR/Inland/default.asp>.

Sincerely,

CLIFTON HICKS, Lt Colonel, USAF
Director, USAF National SAR School

INLAND SEARCH AND RESCUE PLANNING COURSE

(Education & Training Course Announcements course number: E5AZG1C371-00AA)

The National Search & Rescue School was established in 1966 as a facility devoted exclusively to training professionals to conduct search and rescue (SAR). The school is currently located at USCG Training Center Yorktown, Virginia, and teaches a variety of maritime and inland search planning courses. Graduates number over 22,000 men and women, civilian and military, including over 1,800 from 103 foreign nations.

The 5-day Inland SAR Planning course is a comprehensive look at inland search theory and its application to land and air searches for missing persons and aircraft with a focus on wilderness, not urban, searches.

The course consists of classroom lessons and practical, tabletop exercises. This course does not incorporate field training. Emphasis is on the planning necessary for effective area-type searching during an extended search using Probability of Success (POS), rather than just a few elements of POC (POA) or POD, to predictively allocate limited resources to their best effect. In essence, what to do after the rapid (hasty) search and specialty resources have not found the missing person. Additional topics include pre-plan development, legal aspects, the federal role in SAR, and related subjects. The course does not teach search tactics or technical procedures, as those are well covered from other readily available sources.

The course is directed toward SAR leaders in federal, state, and local emergency services and law enforcement, as well as Civil Air Patrol, international, and volunteer SAR agencies -- **those few people who are responsible for the planning and overall conduct of inland search missions.** The target audience includes on-scene incident commanders and their planners, operations leaders, and up-channel reporting chain. The general searcher or search team leader, while arguably the most important part of the SAR team, will not find this course useful.

Aiming to "find the objective fast," the course centers on tools to help SAR decision makers determine where to search, how to divide an area between limited search resources, and how to craft the overall search effort to gain the best increases in likelihood of success at each step. The tools are mathematically based and not for the faint of heart; they help quantify the uncertainties of the search problem to allow consistent application throughout a mission.

Classes begin promptly at 0800 on the convening date and graduate by 1500 on the fifth day.

Prior to class, students should review and be conversant on the following from their own agencies in order to make class discussions more useful and help integrate class materials with their own search environments back home:

- o Search pre-plans
- o Decision making guidelines for where/when/how to search
- o Agreements and relationships with other SAR agencies
- o How their agency organizes on scene
- o Recent search missions

A firm grounding in SAR terminology and employment techniques, practical SAR experience, basic arithmetic and calculator skills, an understanding of local SAR mission management requirements, and **an open mind** are essential.
